

CA Spectrum / DX NetOps — Operational Reports → Grafana Migration Mapping

Maps NetOps Performance Center “Run Operational Reports” to the migrated Grafana dashboards · Dev environment: `dev-grafana.forwardinc.biz/grafana` · Folder: **Operational Reports**

21 Migrated

3 Partial

1 Not feasible

of 25 reports → 13 dashboards

How the mapping works: NetOps lists each report up to three times by scope — : **All**, : **Group**, : **Selected Devices**. In Grafana each set is a **single dashboard** driven by variables: **All** = Global Collection picker on *All*; **Group** = pick a collection (\$group); **Selected** = pick devices (\$devices). That is why 25 NetOps reports map to 13 Grafana dashboards. **Legend:** Migrated Partial Not feasible

Alarm Reports

NetOps “Run Operational Reports”	Grafana dashboard	Scope	Status	Open in Dev
Alarm Log: All	Alarm Log	All	Migrated	Open ↗
Alarm Log: Group	Alarm Log	Group	Migrated	Open ↗
Alarm Log: Selected Devices and Models	Alarm Log	Selected	Migrated	Open ↗
Top-N Devices and Models with Most Alarms: All	Top-N Devices & Models with Most Alarms	All	Migrated	Open ↗
Top-N Devices and Models with Most Alarms: Group	Top-N Devices & Models with Most Alarms	Group	Migrated	Open ↗
Top-N Most Common Alarms: All	Top-N Most Common Alarms	All	Migrated	Open ↗
Top-N Most Common Alarms: Group	Top-N Most Common Alarms	Group	Migrated	Open ↗
Alarm Activity by User: All	Alarm Activity by User	All	Migrated	Open ↗
Alarm Activity by User: Group	Alarm Activity by User	Group	Migrated	Open ↗
Alarm Activity by User: Selected Devices and Models	Alarm Activity by User	Selected	Migrated	Open ↗
Alarm Mean Time to Respond Statistics: All	Alarm Mean Time to Respond	All	Migrated	Open ↗
Alarm Mean Time to Respond Statistics: Group	Alarm Mean Time to Respond	Group	Migrated	Open ↗
Alarm Noise Reduction	— (produced by the AIOps / correlation layer, not the Spectrum reporting schema)	—	Not feasible	—

Availability Reports

NetOps report	Grafana dashboard	Scope	Status	Open in Dev
---------------	-------------------	-------	--------	-------------

Top-N Least Available: All	Device Availability	All	Migrated	Open ↗
Top-N Least Available: Group	Device Availability	Group	Migrated	Open ↗
Outage Log: All	Outage Log	All	Migrated	Open ↗
Outage Log: Group	Outage Log	Group	Migrated	Open ↗
Availability by Class and Vendor: All	Availability by Class & Vendor	All	Migrated	Open ↗
Availability: Group	Device Availability (Top-N approximates the full per-device list)	Group	Partial	Open ↗

 Asset Reports

NetOps report	Grafana dashboard	Scope	Status	Open in Dev
Current Assets: All	Current Assets	All	Migrated	Open ↗
Current Assets: Group	Current Assets	Group	Migrated	Open ↗
Current Ports Summary: All	Current Ports	All	Migrated	Open ↗
Current Ports Summary: Group	Current Ports	Group	Migrated	Open ↗
Current Assets (Customizable): All	Current Assets (fixed columns)	All	Partial	Open ↗
Current Port Assets (Customizable): All	Current Ports (Port Assets table)	All	Partial	Open ↗

+ Supporting dashboards (drill-downs & enhancements — not separate NetOps menu items)

Grafana dashboard	Role	Open in Dev
Device Detail	Shared per-device drill-down (linked from Availability, Outage Log, Alarm Log, Current Ports)	Open ↗
Alarm Detail	Single-alarm drill-down (linked from Alarm Log)	Open ↗
Availability (Business Hours)	Enhancement — business-hours availability (Jasper offered this as a report parameter)	Open ↗
